## TODAY 'S AGENDA

# Background

---

## Proposal

---

## Discussion

## BACKGROUND

# ML in Content Creation Workflows

# The Problem

1. Many shared problems ML techniques could be applicable to
2. Nobody knows what to build or how to talk about it
3. Need a safe space to explore

# ML in Content Creation Workflows

## The Solution

1. ML Working Group
2. Incubator to co-develop projects that use ML in artist-serving ways
3. Lead vision of hype-free, ethical development

## TODAY 'S AGENDA

# Background

# Proposal

---

# Discussion

# Dailines Transcription / Note Taking

- Timely, high-quality notes from dailies and reviews are crucial for content creation
- Existing dailies discussions and notes provide ample training data for machine learning
- Let's try that!

# Goals

- Automate Transcription and Note-Taking
- Modular Design
- Shotgrid Integration
- Flexibility and On-Premise Deployment

# Features – MVP

- Transcription
  - Advanced Speech-to-Text
  - Speaker Identification
- LLM-Based Analysis
  - LLM Integration
  - Note Generation
  - Action Item Extraction
- Shotgrid Integration
  - Shot/Asset Recognition
  - Note Creation/Updating
  - Note Linking
  - Timestamp Navigation

# Additional Features

- In Scope
  - Manual editing, note-taking, and tagging
  - Search and filtering results
- Out of Scope
  - Real-time ID direct from audio/video
  - Sentiment analysis
  - Anything but Shotgrid
